

PRISMPAY

osCommerce Plugin Installation Guide

Before installing the OS Commerce plugin, download the Zip file and extract it. After extraction you will receive two folders "lang" and "module". Copy the "lang" folder file into the OS Commerce Installation Directory /includes/languages/English/modules/payment/ and the "module" folder file into OS Commerce Installation Directory /includes/modules/payment/ and the follow the below steps.

1) Log into your osCommerce admin panel.

Administration | Online Catalog | Support Site

iPayment (ELV)			
iPayment (Prepaid)			

6) PrismPay OS Commerce payment module should now be successfully installed. Now click on the edit button and save the settings.

The screenshot displays the osCommerce admin interface. On the left, a sidebar menu lists various system components. The main area is titled 'Payment' and contains a table of installed modules. The 'PrismPay Gateway' module is highlighted, and its configuration settings are visible on the right side of the page. These settings include version information, documentation links, and various integration parameters.

7) Afterwards click on the edit button.

The screenshot shows the configuration form for the PrismPay Gateway. It includes several sections with radio button options and text input fields. The sections are: 'Enable PrismPay Gateway Integration Method' (True/False), 'Account ID' (text input), 'Sub Account ID' (text input), 'Merchant PIN' (text input), 'Transaction Mode' (Live/Test), and 'Sort order of display' (text input).

Release Notes:
